PROFESSIONAL SUMMARY

Angular Developer with 2+ years of experience in designing, developing, and maintaining scalable and high-performance Single Page Applications (SPA) using Angular (v12–20), TypeScript, and JavaScript (ES6+). Strong expertise in Angular CLI, RxJS, Angular Material, RESTful API integration, responsive & mobile-first design, cross-browser compatibility, and performance optimization. Experienced in translating UI/UX designs into reusable components and collaborating with backend, QA, and design teams in an Agile environment.

CORE SKILLS

Angular | TypeScript | RxJS | REST APIs | Responsive Design

TECHNICAL SKILLS

Angular & Core: Angular (v12,15,17,18,19,20), TypeScript, JavaScript (ES6+)

- **UI Development:** HTML5, CSS3, SCSS, Bootstrap 5, Angular Material, PrimeNG
- **Frontend Engineering:** RxJS, Observables, Component Architecture, Lazy Loading, State Management
- **Backend Technology:** Node.js, Next.js
- **API Integration:** REST APIs, HTTPClient, JSON, AJAX
- **Tools:** Git, GitHub, Jira, npm, VS Code, Agile/Scrum

SOFT SKILLS

- Problem Solving & Analytical Thinking
- Communication & Collaboration
- Attention to Detail
- Time Management
- Adaptability (Agile Environment)
- Ownership & Accountability

PROFESSIONAL EXPERIENCE

Software Engineer

2024 – Present

Inxise Datalabs Pvt.Ltd. –Pune

- Led UI development using Angular with a scalable component-based architecture
- Worked with Angular versions (v18–v19–v20), Developed responsive interfaces using Angular, HTML5, CSS3, and Bootstrap
- Integrated REST APIs using HTTPClient for dynamic chatbot modules.
- Improved frontend performance by 30% through DOM optimization and efficient rendering Collaborated with cross-functional teams in an Agile environment.
- Worked on backend development using Node.js, including API creation, data handling, and integration with frontend applications.
- Maintained clean, version-controlled code using Git

PROJECTS

Merren.io – Survey & Feedback Web Application (Current Project)

- Developing scalable frontend features using Angular and TypeScript, contributing to a stable and maintainable application
- Designed dynamic forms for survey and feedback collection, improving usability and user interaction
- Implemented validations and error handling, increasing form accuracy and reliability
- Used **RxJS** and **HttpClient** for asynchronous data handling and API integration
- Collaborating in an Agile environment, continuously improving features based on feedback

Portfolio Website

- Developed a responsive Angular 20 portfolio SPA with lazy-loaded standalone routes, cutting initial bundle size via code splitting.
- Built a signal-based theming system (dark/light mode) with localStorage persistence and system-preference detection.
- Created a reusable scroll-animation directive to drive on-scroll UI reveals across all sections.
- Integrated a serverless contact form using EmailJS and RxJS observables with typed request/response handling.

E-Commerce SPA

- Developed a responsive e-commerce SPA using Angular 19 with standalone components and Signals-based state management, eliminating the need for NgRx
- Implemented cart management system with localStorage persistence, real-time totals, and quantity controls using computed signals
- Built reusable UI with Angular Material, including a router-synced tabbed interface and global toast notification service
- Added typed reactive forms with custom validation (email, phone regex) and unit test coverage across components/services

EDUCATION

PGDM/MBA – Pursuing

MIT School of Distance Education, Pune

2025- Present

Bachelor's of Computer Science

Shivaji University

2019-2022
